

AMENDMENTS

In Response to the Examiner's Action dated 7 August 2001 (Application No. 09/616,870), please amend the present application as follows:

In the title:

Please amend the title to: "Dressing Mechanism"

In the claims:

Claim 26 (twice amended)

A dressing mechanism comprising: a first section, a second section, and a third section; the first section being coupled to the second section and the second section being coupled to the third section; the second section comprising an elastic material; the first section and the third section each having a first side; and a predetermined portion of the first side including an adhesive located thereon; and wherein the second section includes a first linear margin and a second linear margin; the first section being [integral to] integrally formed as a one piece construction with the second section at the first margin; and the third section being [integral to] integrally formed as a one piece construction with the second section at the second margin.

Claim 32 (amended)

[The] A dressing mechanism [of claim 26 wherein] comprising: a first section, a second section, and a third section; the first section being coupled to the second

section and the second section being coupled to the third section; the second section comprising an elastic material; the first section and the third section each having a first side; and a predetermined portion of the first side including an adhesive located thereon; and wherein the second section includes a first linear margin and a second linear margin; the first section being integral to the second section at the first margin; and the third section being integral to the second section at the second margin; and

wherein the first section and the third section are laminated materials comprising a first layer, a second intermediate layer, and a third layer; the third layer including the first side.

Claim 33 remains as once amended.

Claims 34 - 35 remain as originally presented.

Claim 36 remains as once amended.

Claims 37 – 40, inclusive, and 42 remain as originally presented.

Claim 43 remains as once amended.

Claims 44 - 45 remain as originally presented.

Claim 46 remains as once amended.

Claims 47 – 54, inclusive, remain as originally presented.

Claims 104 - 117, inclusive, remain as presented in Amendment A

Please add the following new claims:

Claim 118

Sums 727
D
A dressing mechanism comprising: a first section, a second section, and a third section; the first section being coupled to the second section and the second section being coupled to the third section; the second section comprising an elastic material; the first section and the third section each having a first side; and a predetermined portion of the first side including an adhesive located thereon; and wherein the second section includes a first linear margin and a second linear margin; the first section being integral to the second section at the first margin; and the third section being integral to the second section at the second margin; and wherein the first section and the third section are laminated materials comprising a first layer and a second layer; the second layer including the first side.

Claim 119

The dressing mechanism of claim 118 wherein the second section includes a plurality of openings.

Claim 120

Sums 737
The dressing mechanism of claim 119 wherein the openings are of a predetermined size.

347
17
Claim 121

The dressing mechanism of claim 119 wherein the openings are of a predetermined shape.

Claim 122

The dressing mechanism of claim of claim 121 wherein the openings of predetermined shape are spatially organized in a predetermined manner respective to each other.

Claim 123

The dressing mechanism of claim 118 wherein the second section includes a first margin and a second margin; the first section being integral to the second section at the first margin; and the third section being integral to the second section at the second margin.

Claim 124

17
17
The dressing mechanism of claim 118 wherein the first section and the third section are laminated materials comprising a first layer, a second intermediate layer, and a third layer; the third layer including the first side.
